PROFESSIONAL SUMMARY

Senior Technical Product Manager with 10+ years of product roadmap and strategy ownership across telecom, e-commerce, and insurtech. Experienced in digital channels, checkout and payment systems, CMS platforms, API integrations, Design Systems, and Micro Frontend (MFE) and microservices architectures. Track record includes EUR 20M+ transformation planning, 10+ brand design system adoption, 15% fraud reduction, and double-digit sales improvements.

WORK EXPERIENCE

FUNCTIONAL LEAD - DIGITAL CHANNELS

Jan 2022 - Present

Telefónica / O2 Germany

Berlin, Germany

- Lead the Sales and Customer Base Marketing areas within the B2X platform transformation program, coordinating 2 Technical Product Owners, 2 Product Managers, and 5 Product Managers across roadmap, scope, and delivery priorities.
- Own the internal Design System application, supporting 10+ internal brands and enabling reusable UI components for Micro Frontend delivery and UX design teams.
- Own Adobe Experience Manager (AEM) and Adobe Target platforms, partnering with frontend, backend, UX, and business teams to build reusable personalization and A/B testing capabilities.

Key Achievements

- Prepared transformation program roadmap and execution planning via launchable milestones for a EUR 20M+ enterprise digital transformation program across Sales and Customer Base Marketing areas, aligning scope, dependencies, and delivery priorities.
- Established a new CMS ecosystem using Adobe Experience Manager, improving marketing platform scalability.
- Introduced a Design System library supporting 10+ internal brands, improving UI consistency and development efficiency.

PRODUCT MANAGER

Jun 2021 - Dec 2021

AUTO1 Group / Autohero

Berlin, Germany

- Owned the B2C checkout and post-order product roadmap, leading a cross-functional team of 5 backend engineers, 4 frontend engineers, and 2 QA engineers across the Autohero digital commerce platform.
- Led integration of a third-party checkout service provider, collaborating with engineering teams to improve transaction flow and platform scalability through API integration.
- Introduced checkout A/B testing capabilities for purchase journey experiments, enabling data-driven optimization of payment and post-order flows.
- Implemented ID verification for direct payment transactions to enhance payment security and fraud prevention.

Key Achievements

- Reduced payment fraud by 15% through implementation of ID verification in the checkout flow.

TECHNICAL PRODUCT MANAGER
simplesurance GmbH

Oct 2019 - Jun 2021
Berlin, Germany

- Acted as Functional Lead for a platform refactoring initiative, leading 6 backend engineers, 2 frontend engineers, and 2 UX designers across backend architecture and frontend integration.
- Managed product roadmap and scope definition with Finance and Customer Care stakeholders, plus external partners including Allianz and Samsung.
- Served as Technical Product Owner for internal platforms including Product Catalogue, finance tools, and Customer Control Panels.
- Integrated external partners into core systems through API Gateway capabilities, improving partner onboarding and platform connectivity.

Key Achievements

- Released a white-label Samsung payment solution with customized payment UI, increasing white-label sales by 35%.
- Released the company's first credit card bundle product through API integration, increasing monthly sales by 7%.

PROJECT COORDINATOR

DHL Czech Republic

Oct 2017 - Aug 2018
Prague, Czech Republic

- Coordinated scope definition, planning, and prioritization for a B2B server transformation project, aligning technical requirements with business stakeholders.

PRODUCT OWNER

Vodafone Turkey

Jun 2013 - Sep 2017
Istanbul, Turkey

- Managed B2C product portfolio and pricing strategy, including Public, Farmer, Senior, International, and Terminal product segments.
- Served as Product Catalogue Stream Lead within a large-scale Vodafone IT transformation program.
- Defined and managed product roadmap for Terminal and Farmer product portfolios, prioritizing new capabilities and features based on customer insights and market needs.

Key Achievements

- Introduced Farmer and Senior customer segments for the first time in Turkey, expanding Vodafone's B2C product portfolio by 5%.
- Implemented Multi-Commitment terminal product solution, enabling multiple device sales, doubling promotional campaign revenue, and increasing device revenue by 30%.
